SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Dear Sir:

The references listed on the attached form PTO-1449 relate to the subject matter of the present invention and are brought to the attention of the Patent and Trademark Office pursuant to 37 C.F.R. 1.56 and 1.98.

Applicant hereby attaches U.S. Patent Office Form PTOL-1449, including copies of the prior art references listed therein. These references were cited in the Supplemental European Search Report of a corresponding European Patent application. A copy of the Supplemental EPO Search Report is also enclosed. The claims in the present application are believed to be patentably distinguished over these references. Certain of the references referred to in the enclosed EPO Supplemental Search Report have been previously submitted or cited in this case. Accordingly, no copies of the previously cited references are provided, and it is respectfully submitted that no copies of these references are believed necessary.

Applicants note that references DE 3516743 and DE 2933174 are not in the English language, and English language abstracts are provided. Applicants further note that reference FR 2242068 is not in English, and the English abstract is unavailable. The FR 2242068 reference was cited in the European Search Report under Category X, meaning that, according to the EPO examiner, the reference is particularly relevant to the claims.

This prior art disclosure statement is being made pursuant to the duty of disclosure imposed by law and formulated in 37 CFR 1.56(A). No representation is made that the information thus disclosed in fact constitute prior art or that it is the closest prior art, inasmuch as 37 CFR 1.56(A) relies on a materiality concept which depends on subjectivity.

This statement is being submitted prior to a first office action on the merits. While this statement contains all the relevant information presently known to the applicant, it should not be interpreted as a representation that an exhaustive search has been conducted or that no other relevant information exists. Also, this statement should not be interpreted as a representation that any cited reference is prior art, or that any cited reference is "material to patentability" as defined in 37 CFR §1.56. The applicant invites the Examiner to make an independent evaluation of each cited reference, copies of which are enclosed, to determine their relevance to the subject matter of the present application.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Edmund P. Pfleger', is written over the typed name.
